Education

Graphic Era Hill University, Dehradun <i>B.Tech in Computer Science and Engineering</i>	2023 - present 7.84/10 CGPA
The Horizon School, Jolly Grant <i>12th CBSE</i>	2023 84.4/100%
The Horizon School, Jolly Grant <i>10th CBSE</i>	2021 92.2/100%

Projects

LearnHub – AI-Powered Learning Platform — React, Node.js, Express.js, MySQL, Groq LLM [Source Code](#)

- Engineered a full-stack AI-powered learning platform enabling users to upload PDF study materials and generate AI-based short notes, formulas, flashcards, and MCQ quizzes.
- Integrated Groq LLM API with OpenRouter as a fallback for reliable AI content generation, adding rate-limit handling and robust response processing across notes, quizzes, flashcards, and formulas.
- Implemented JWT-based authentication and user-scoped access control with PDF text extraction and chunk-based processing, ensuring users securely manage and generate learning content from their own study materials.

Credit Card Fraud Detection System — Python, Scikit-learn, Random Forest, Streamlit [Source Code](#)

- Developed a Credit Card Fraud Detection System using Machine Learning to identify fraudulent transactions in a highly imbalanced dataset of 284,807 transactions, including only 492 fraud cases.
- Optimized a Random Forest fraud detection model using a 0.30 probability threshold, achieving 99.92% accuracy, 72.64% precision, 81.05% recall, and 76.62% F1-score on an unseen test dataset.
- Designed an interactive Streamlit dashboard supporting batch CSV prediction, single transaction analysis, fraud probability visualization, and model evaluation.

Lost and Found Portal — HTML, CSS, JavaScript, Node.js, MySQL [Source Code](#)

- Created a web-based Lost and Found Portal enabling users to report, track, and claim lost or found items through a centralized platform.
- Established secure user authentication with registration and login functionality.
- Integrated a MySQL database with image upload support, item claim management, and RESTful APIs for efficient item tracking and recovery.

Technical Skills

Languages: Java, Python, JavaScript, C++, C, SQL

Web Technologies: React, HTML, CSS, REST APIs

Backend & Databases: Node.js, Express.js, MySQL, MongoDB

Frameworks and Libraries: Scikit-learn, Pandas, NumPy, Matplotlib, Streamlit

Tools & Platforms: Git, GitHub, VS Code, Jupyter Notebook, Google Colab

Coursework: Object-Oriented Programming, Data Structures and Algorithms, Database Management Systems, Operating Systems.

Achievements & Leadership

- Solved 200+ DSA problems across LeetCode
- Served for 1.5 years as a Core Member of the IEEE Sub-Branch, organizing technical workshops for students
- Member of GDG club, organized and presented 2 workshops for junior students on Machine Learning and Generative AI

Certifications
