Education

Graphic Era Hill University, Dehradun

B.Tech in Computer Science and Engineering

2023 - present

7.83/10 CGPA

The Horizon School, Jolly Grant

12th CBSE

2023

84.4/100%

The Horizon School, Jolly Grant

10th CBSE

2021

92.2/100%

Projects

LearnHub – AI-Powered Learning Platform — React, Node.js, Express.js, MySQL, Gemini AI [Source Code](#)

- Engineered a full-stack AI-powered learning platform enabling users to upload PDF study materials and generate AI-based short notes, formulas, flashcards, and MCQ quizzes.
- Implemented Gemini 3.5 Flash-Lite with Groq GPT-OSS-20B as a fallback, along with JWT authentication, user-scoped access control, PDF text extraction, and chunk-based processing for reliable content generation.
- Deployed full-stack production infrastructure across Cloudflare for frontend delivery, Render for backend API services, and Aiven for managed MySQL database hosting.

Credit Card Fraud Detection System — Python, Scikit-learn, Random Forest, Streamlit

[Source Code](#)

- Developed a Credit Card Fraud Detection System using Machine Learning to identify fraudulent transactions in a highly imbalanced dataset of 284,807 transactions, including only 492 fraud cases.
- Optimized a Random Forest fraud detection model using a 0.30 probability threshold, achieving 99.92% accuracy, 72.64% precision, 81.05% recall, and 76.62% F1-score on an unseen test dataset.
- Designed an interactive Streamlit dashboard supporting batch CSV prediction, single transaction analysis, fraud probability visualization, and model evaluation.

Lost and Found Portal — HTML, CSS, JavaScript, Spring Boot, MySQL

[Source Code](#)

- Created a web-based Lost and Found Portal enabling users to report, track, and claim lost or found items through a centralized platform.
- Built Spring Boot backend with JWT login, secure password reset via email, and automated email notifications when items are claimed or verified.
- Integrated MySQL for persistent data management and developed RESTful APIs for item management, image uploads, claim processing, and efficient item tracking.

Technical Skills

Languages: Java, Python, JavaScript, C++, C, SQL

Web Technologies: React, HTML, CSS, REST APIs

Backend & Databases: Spring Boot, Node.js, Express.js, MySQL, MongoDB

Frameworks and Libraries: Scikit-learn, Pandas, NumPy, Matplotlib, Streamlit

Tools & Platforms: Git, GitHub, Docker, Postman, Apache Kafka, Google Colab

Coursework: Object-Oriented Programming, Data Structures and Algorithms, DBMS, Operating Systems

Achievements & Leadership

- Solved 200+ DSA problems on LeetCode
- Served for 1.5 years as a Core Member of the IEEE Sub-Branch, organizing technical workshops for students

Certifications

JP Morgan Chase & Co. — Software Engineering Job Simulation

Forage · OCT 2025

- Worked on a Spring Boot transaction-processing service using Kafka, Spring Data JPA, H2, and REST APIs.
- Learned asynchronous messaging, transaction processing, database persistence, and external API integration.

IBM — Machine Learning with Python

Coursera · DEC 2025

- Learned fundamental machine learning concepts and implemented models using Python and scikit-learn.
- Worked with data preprocessing, model training, evaluation, and common supervised learning algorithms.
